The goals of the ISSCC Student Research Preview is to encourage student participation and networking at ISSCC. In particular, it will provide graduate students (Masters and PhD candidates) with:

- A great opportunity to showcase the directions of their work
- An opportunity to experience ISSCC quality
- An opportunity to interact with others in the ISSCC community
- Encouragement for future regular-paper submissions

More particularly, it will provide graduate students with:

- An opportunity for mutual understanding of academic research styles and cultures
- An opportunity to exchange experiences
- An opportunity to improve communication skills

The ISSCC Student Research Preview is organized as short presentations of work-in-progress in conjunction with a poster presentation and optional demo. The presentations and posters will NOT be considered as prepublication in future ISSCC or other SSCS sponsored conferences or journal submissions. However, presenters should not post the work or the title of their presentation on their website (this will be considered prepublication). The focus of the SRP presentation should be on student's novel ideas not published elsewhere and can describe research-in-progress. Multiple authors are allowed, but the presentation should focus on research from a single student.

Results with actual silicon implementation are encouraged, although not required. Papers that are being reviewed by another journal or conference do not qualify for the SRP unless there is a significant difference between the SRP submission and the papers already being reviewed. Papers that have been accepted as a regular presentation at ISSCC or that overlap substantially with an accepted ISSCC paper will not be considered for the Student Research Preview session. However, papers that significantly extend a prior ISSCC publication by the student will be considered.

An endorsement from the advisor is required by the submission deadline. Each faculty member can recommend only one student from his or her group. An author, including faculty members, must not appear in more than one submission. The students should consult with their advisor prior to submitting slides to inform the advisor of this one-submission rule per group and the need to submit an endorsement.

The ISSCC student registration fee will be waived for the presenter of an accepted presentation. Speakers will be contacted about how to claim the free Conference student registration. In addition, SRP presenters can apply for a competitive travel grant through the Solid-State Circuits Society's Student Travel Grant program. A prize for the Outstanding Poster Presentation will be awarded. Please, note that students who have their presentation accepted should apply for a visa as soon as they have received notice of acceptance. Letters of invitation can be received by contacting Melissa Widerkehr: MelissaW@widerkehr.com.
Submission of the Slides
A short PowerPoint presentation must be submitted using a Powerpoint visuals template that is available from the following website (https://www.epapers.org/isscc-srp2020). If you are interested in giving a demo during the poster session, please indicate so on the last slide of the submission. In addition, the advisor of the student must send an endorsement to the SRP Secretary, Professor Tinoosh Mohsenin (tinoosh@umbc.edu). The PowerPoint file consists of the following:

- One slide with basic information about the submission (see Template).
- One slide that lists the research area, title of research, student's name, department, university, contact information, awarded degrees, degree now being pursued, advisor's name, position, and contact information.
- One slide of less than 150-word abstract.
- 5 slides of research overview and research details. References must be made to others’ earlier work, preferably that published in ISSCC, JSSC, or other IEEE publications.
- For those who are interested in giving a demo (which is strongly encouraged), fill out the last slide of the submission template.

An acknowledgement will be sent to the authors when the file is received. The author should contact Prof. Tinoosh Mohsenin if he or she does not receive an acknowledgment by email within a couple of days of submission. A template PowerPoint file can be downloaded from the following website https://www.epapers.org/isscc-srp2020/. A prospective speaker must be a student at the time of the conference.

Submission of Final Presentation and Poster
Accepted speakers will be asked to submit the final PowerPoint presentation slides and poster. Information about the format of the slides and poster will be available on the ISSCC website.

Important Dates
October 24, 2019 Abstract and slide submission deadline
November 12, 2019 Acceptance Notification
January 28, 2020 Submission deadline of final presentation
February 16, 2020 Student Research Preview Presentations (7:30-10pm)

Further Information
Visit the ISSCC Student Research Preview website http://www.isscc.org/ for further details. Or contact the SRP Co-Chairs, Dr. Denis Daly at email denis.daly+isscc@gmail.com, Professor Jerald Yoo at e-mail jyoo@nus.edu.sg, or the SRP secretary Professor Tinoosh Mohsenin at email tinoosh@umbc.edu.
ISSCC SRP 2020 Organizing Committee

SRP Co-Chair: Denis Daly, Omni Design Technologies
SRP Co-Chair: Jerald Yoo, National University of Singapore, Singapore
SRP Secretary: Tinoosh Mohsenin, University of Maryland, Baltimore County
Advisor: Anantha Chandrakasan, MIT
Advisor: Jan Van der Spiegel, Univ. of Pennsylvania.
Media/Publications: Laura Fujino, Univ. of Toronto
A/V: Trudy Stetzler

SRP Committee Members
Jason Anderson, University of Toronto, Canada
Masoud Babaie, Delft University of Technology, Netherlands
Andrea Baschirotto, University of Milan-Bicocca, Italy
Hsin-Shu Chen, National Taiwan University, Taiwan
Hayun Chung, Korea University, Korea
Denis Daly, Omni Design Technologies, MA
Shidhartha Das, ARM, United Kingdom
Zeynep Deniz, IBM, NY
Hao Gao, Eindhoven University of Technology, Netherlands
Minkyu Je, KAIST, Korea
Matthias Kuhl, Hamburg University of Technology, Germany
Seulki Lee, IMEC-NL, Netherlands
Yoonmyung Lee, SungKyunKwan University, Korea
Qiang Li, University of Electronic Science & Tech., China
Shih-Chii Liu, University of Zurich/ETH Zurich, Switzerland
Carolina Mora Lopez, IMEC, Belgium
Shahriar Mirabbasi, University of British Columbia, Canada
Tinoosh Mohsenin, University of Maryland, MD
Cormac O'Connell, TSMC, Canada
Mondira Pant, Intel, MA
Negar Reiskarimian, Massachusetts Institute of Technology, MA
Jae-sun Seo, Arizona State University, AZ
Atsushi Shirane, Tokyo Institute of Technology, Japan
Yildiz Sinangil, Apple, CA
GuoXing Wang, Shanghai Jiao Tong University, China
Jeffrey Weldon, University of Hawaii, HI
Chia-Hsiang Yang, National Taiwan University, Taiwan
Rabia Tugce Yazicigil, Boston University, MA
Jerald Yoo, National University of Singapore, Singapore
Samira Zaliasl, Ferric, NY
Milin Zhang, Tsinghua University, China
